

## **Professional Summary**

**Jorge Luis Martínez Trabuco** is a technical advisor to Paraguay's leading productive sector organizations, with extensive experience in agriculture, sustainable production, and their integration with logistics and international trade. He currently advises the Federation of Production Cooperatives—bringing together 34 of the country's largest cooperatives—and the Union of Production Guilds, the main national agricultural association.

He is also an environmental specialist with over 15 years of experience in climate change, sustainability, and natural resource management. He holds a Master's degree in Soil Sciences and Territorial Planning and a Bachelor's degree in Biology, complemented by international training in climate policy and environmental management.

He has served as a strategic advisor to government institutions, international organizations such as UNDP, FAO, and the World Bank, as well as private sector stakeholders, contributing to climate policy development, greenhouse gas inventories, and sustainable production systems. He previously served as National Director of Climate Change in Paraguay and participated as a negotiator in international conferences under the UNFCCC.

In addition, he has academic experience as a university lecturer and is the author of several publications on environmental topics. He is recognized for his ability to bridge production, sustainability, and public policy, linking agricultural development with climate and economic agendas at both national and international levels.
